Part B: Domain Description

Describe your domain chosen for DV II

I choose to explore the Melbourne coffee scene, going into where cafes are located, how Melbourne compares globally and general trends.

Describe the Why and Who aspects of your DV II

I decided to choose to discuss this topic because Melbourne is renowned for its coffee culture, and it is a culture which I frequently participate in. As the topic is specifically on Melbourne coffee, the target audience is primarily residents of Melbourne who want to learn more about the coffee culture in their city.

Describe the “What” aspect of your DV II

There are 3 main sections. The first section looks at café distribution in Melbourne and how accessible they are to residents. The next section looks at how Melbourne stacks up globally to other places. The third section shows the individual locations of cafes in the city. The last section looks at when people visit cafes.

Describe the “How” aspect of your DV II

The first couple charts, a map and a bar chart, go over the distribution of cafes in Melbourne by suburb on a per capita basis. This allows the user to quickly see where cafes are roughly clustered and how many people live near cafes. The next couple of charts, looking at the average distance to a café, also helps with this. The map and bar chart allow the user to see which suburbs have quick and close access to cafes. The next chart going over population and café distribution shows that the distribution of cafes doesn't follow population. The last graph in this section, the line graph, shows the number of cafés in Melbourne over time, showing the steady growth in establishments except for COVID-19.

The next section compares Melbourne to global peers using a bar graph showing the prices of a small flat white across different cities in Australia and the world, and another bar graph showing coffee consumption across the world.

The next section lets the user view specific café locations across the city, allowing the user to see major hotspots in the city and around major transit corridors.

The final section shows what time people start their journeys to cafes, showing peak times for when people go to get coffee.

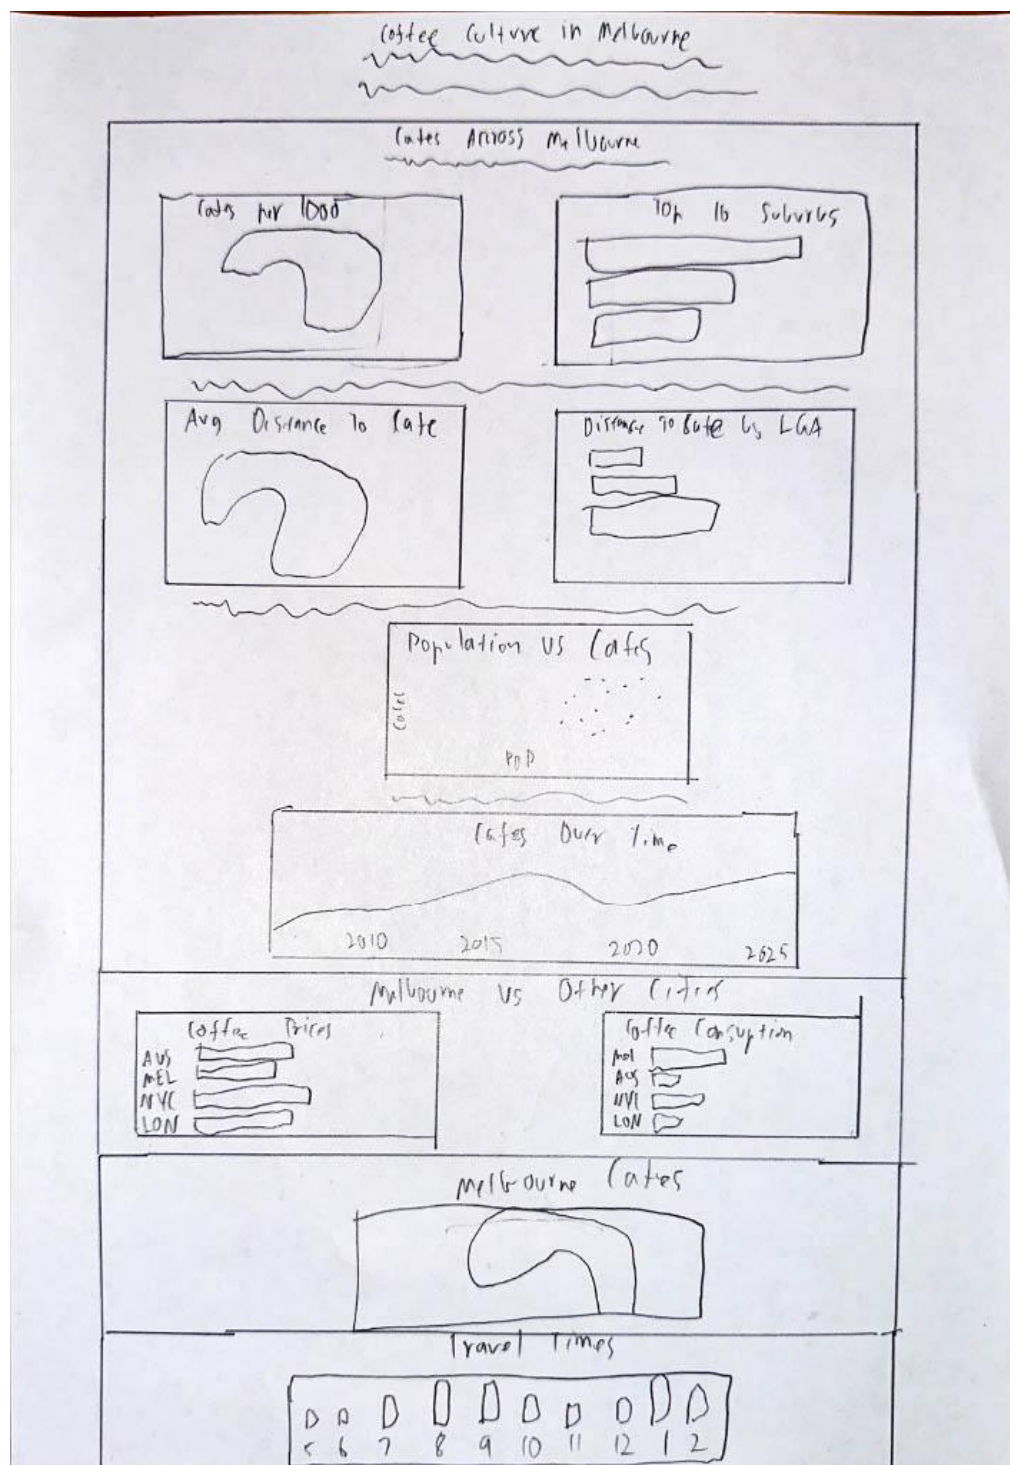

Part C: Sketch

A URL to a PDF document with an image of your sketch on your GitHub account.

Tip: Test your URL in incognito mode to ensure it is a working URL

Paste a screenshot of your sketch for your DV II.

Note: Use the entire page here for the screenshot and ensure that it is clearly legible and visible

Part D: Full-size screenshot of your DV II

Paste a full-size screenshot of your DV II assignment from the URL here

AI Disclaimer

I used Github copilot and ChatGPT to assist in the creation of some of the Vega-lite graphs, the cleansing of some data and to generate parts of the website design
